

# Asset Management Planning NZ State Highways

Tomas Dryburgh

Graduate Engineer

NZTA

# New Zealand State Highways

11,367 km of road

4238 bridges

1,438 km of barriers

50% of all Vehicle Traffic

70% of Freight traffic

# Our asset management plan does the following..

## Link to outcomes

Adopts the new customer first strategy map as a driver of service targets, through these customer values we can link our works to NZTA's long-term impacts

## Investment map

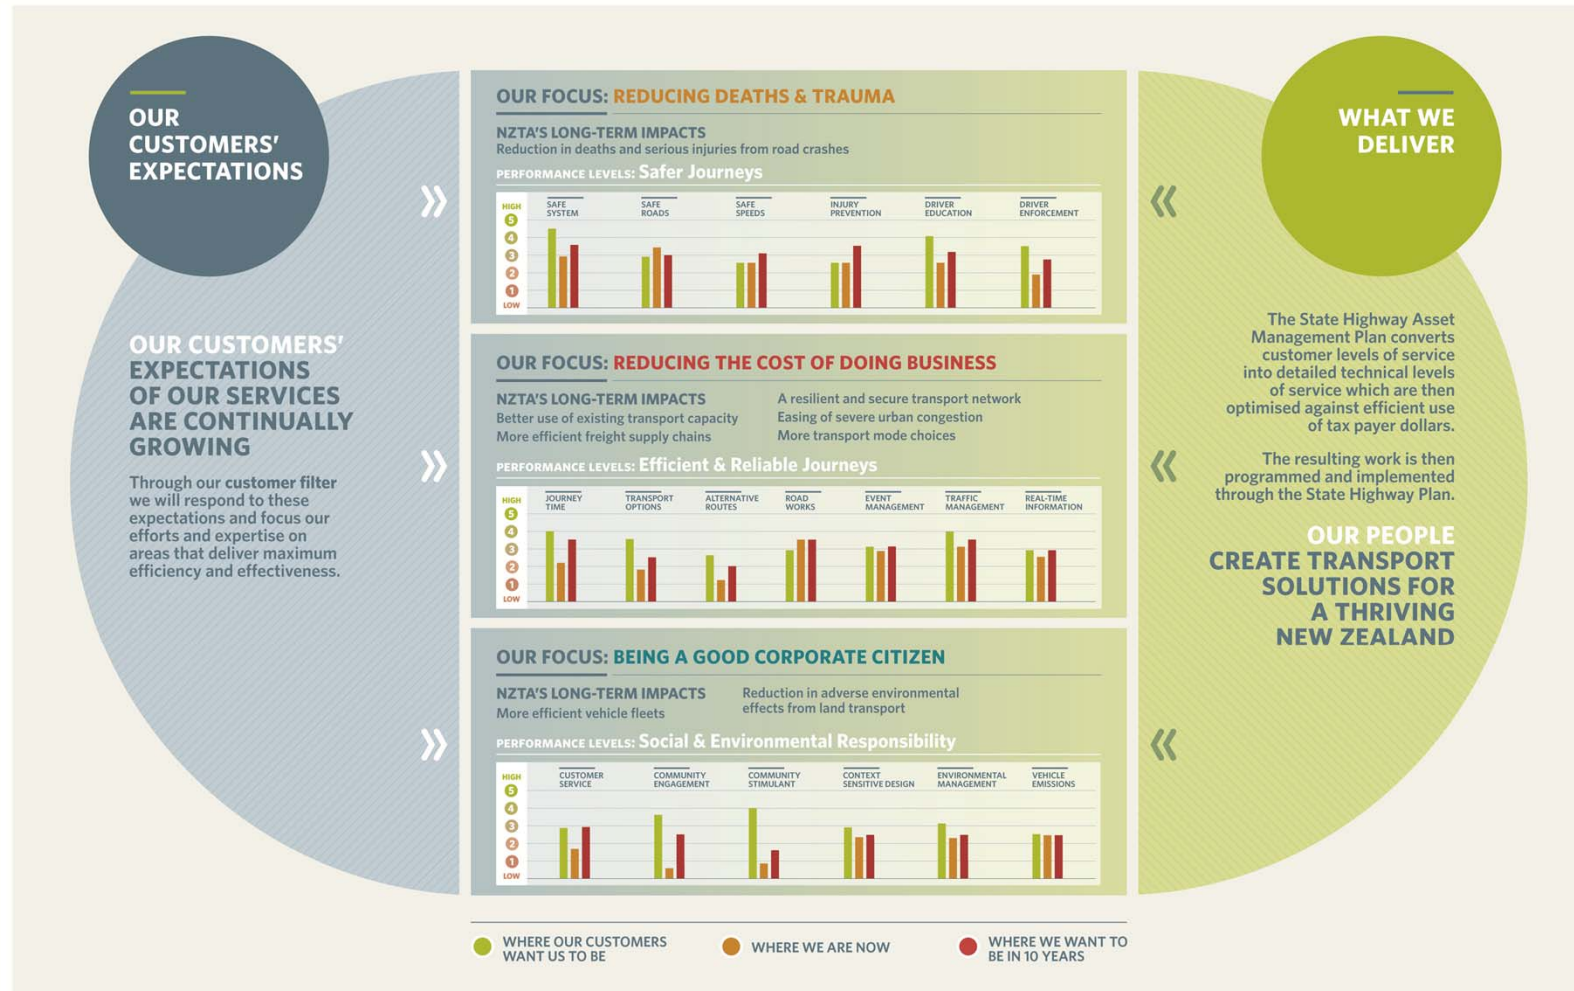

Describes the programme of activities we will implement to deliver the impacts sought.

## Business Case

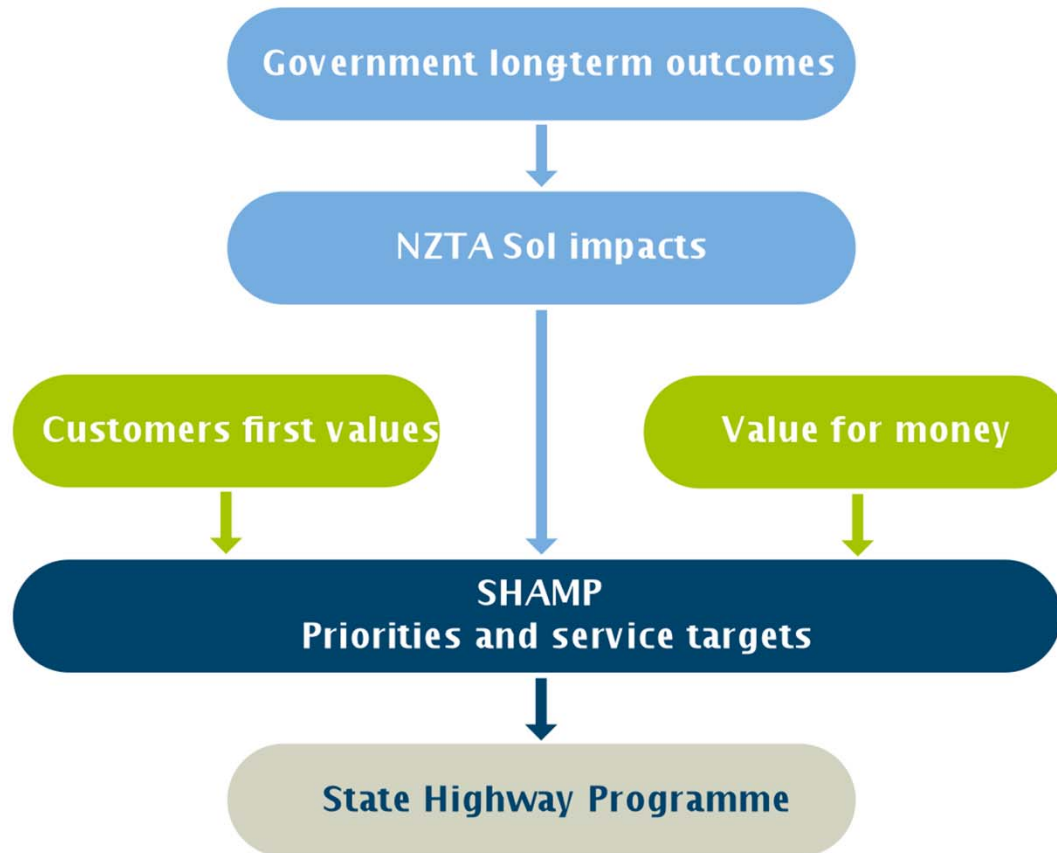

Provides a business case for the activities (maintenance, operations, renewals and improvements) required to deliver the services outlined in our offer.

# Our 'customer first' strategy map

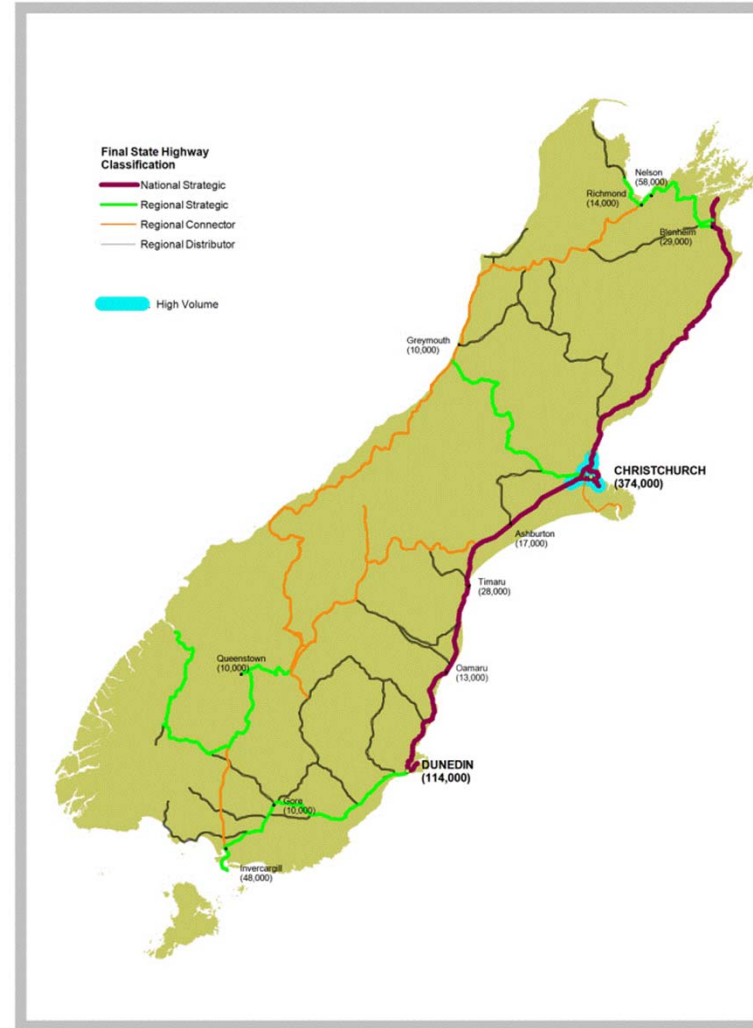

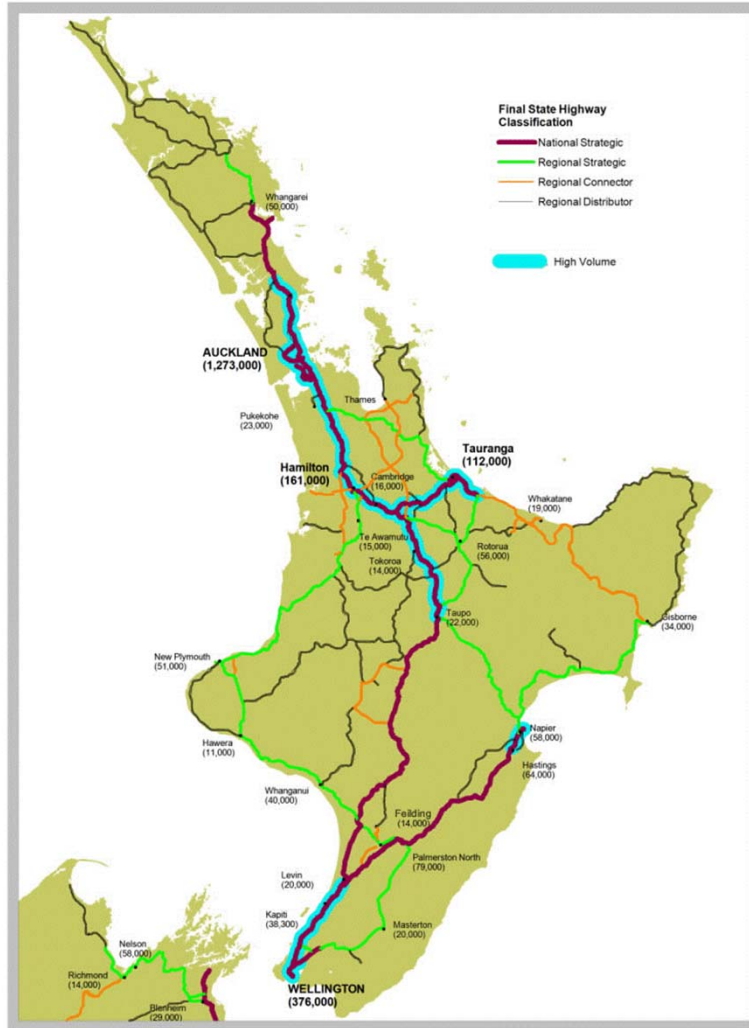

## STATE HIGHWAYS STRATEGY IN ACTION

# Inputs to the State Highway programme

# Variable service targets State Highway Classification

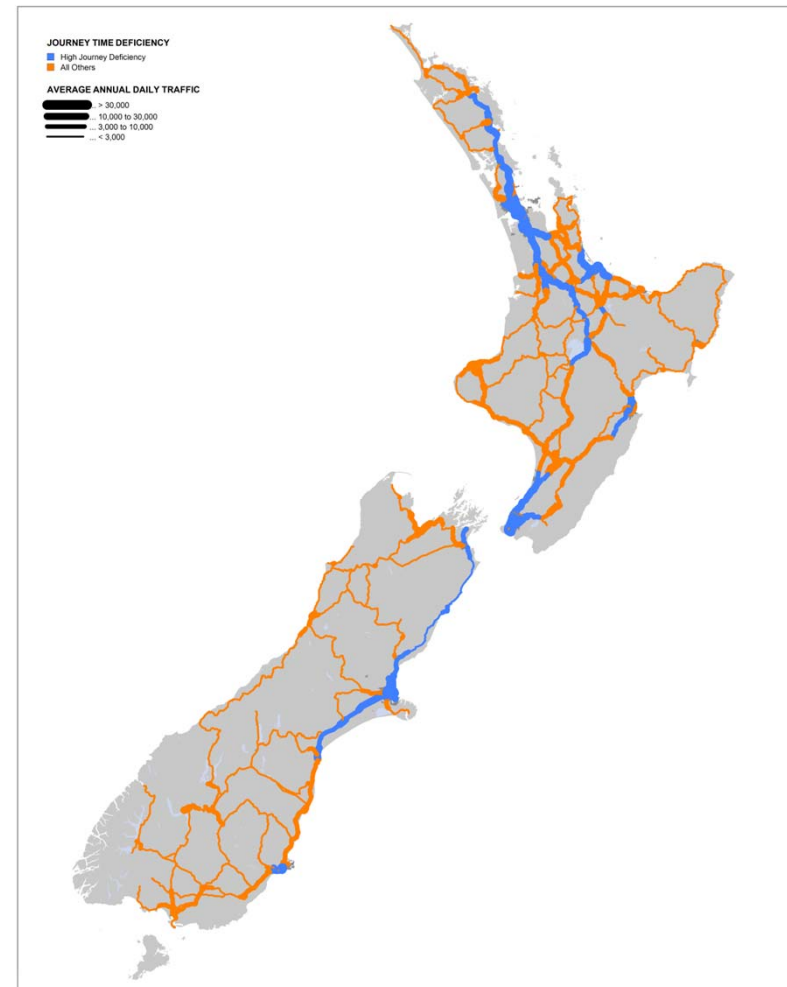

We will better target works to address the greatest need using:

KiwiRap collective risk

Journey time deficiency

# All activities

Operations

Improvements

Maintenance and  
Renewals

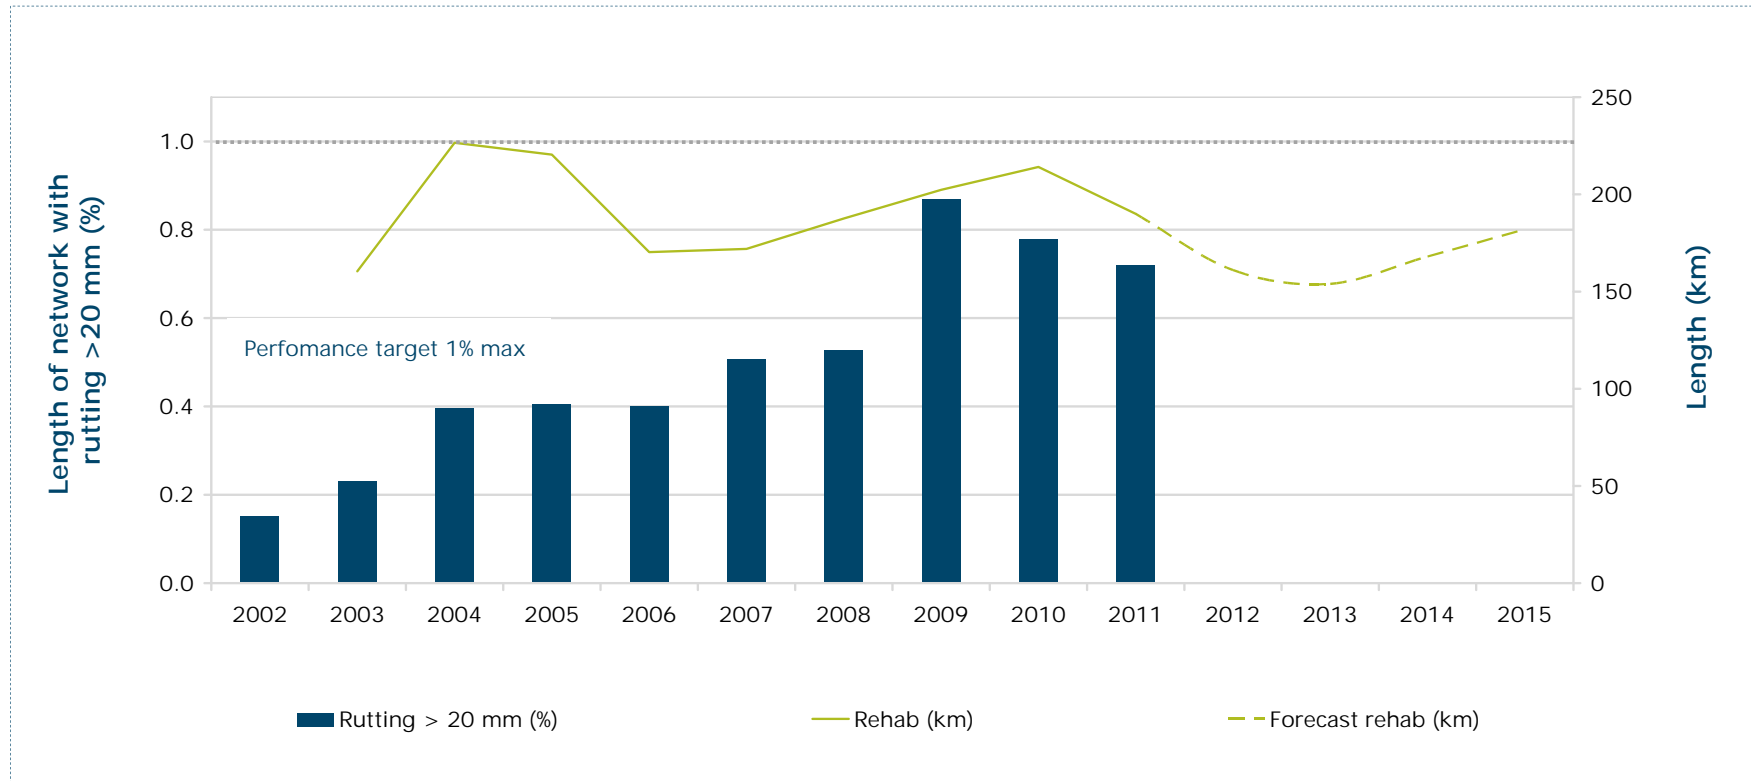

# Business case

- Linking need to work
- Right thing/right scale/right time
- Showing efficiency of execution

# Business case example
